

High Pressure Breathing Air Compressors

Fast 35 High Pressure Breathing Air Compressors

Description

The Fast 35 is American Airworks' lightweight mobile high pressure piston compressors. The unit is 3-staged, air cooled and easy to transport due to the built in wheels. They provide a reliable source of breathing air (CGA Grade E / EN12021 standard) using a uniquely designed purification system (a coalecing prefilter installed before the active carbon/molecular sieve cartridge). It is suitable for private divers, small diving shops, diving boats, and small paintball teams. Its very low turning speed accomplishes a low noise level, almost zero vibration, and ensures long life operation. This is not a continuous duty compressor. It is not designed for refilling large storage cylinders.

Technical Data

Model	Drive	Pressure	Capacity	Purification	Power	RPM	Dimensions	Weight
Fast 35PE	1 or 3 phase 230VAC 60Hz	4,700 psi (324 bar)	3.5 cfm (103 lit/min)	3,200 ft ³ @ 80°F 5,000 ft ³ @ 68°F	3 hp (2.2 kw)	1,200	29 x 14 x 19 in (72 x 34 x 46 cm)	117 lbs (53 kg)
Fast 35PG	Gas Engine	4,700 psi (324 bar)	3.5 cfm (103 lit/min)	3,200 ft ³ @ 80°F 5,000 ft ³ @ 68°F	4.8 hp (3.6 kw)	1,200	35 x 14 x 19 in (87 x 34 x 46 cm)	122 lbs (55 kg)

[•] Oil Capacity: 0.42 qt (400ml) synthetic compressor oil.

Fast 60 High Pressure Breathing Air Compressors

Description

The Fast 60 is a 3-stage, continuous duty compressor, perfect for a wide range of industries. The Fast 60 is the ideal solution for higher pressure air requirements without compromising quality and safety. It is compact in size and very user friendly. A long service life, even under the toughest of endurance conditions, proves its industrial quality. The Fast 60 is comprised of an integrated condensation filter process that uses a coalescence filter and a long-life filter cartridge to produce CGA Grade E / EN12021 standard Breathing Air.

Technical Data

Model	Drive	Pressure	Capacity	Purification	Power	RPM	Dimensions	Weight

Fast 90 High Pressure Breathing Air Compressors

Description

Our Fast 90 breathing air compressors provide 5000 PSI and 6000 PSI breathing air. The Fast 90 breathing air compressor is compact in size, very user friendly and our most popular model. This compressor is great for the small to mid-sized fire departments, fire brigades, dive shops and paintball fields. Complete with a 20,000 CF cartridge purification chamber (CGA Grade E and EN12021 standards). We have packed this HP compressor with many standard features that others charge extra for. The Fast 90 is a continuous duty compressor.

Technical Data

Model	Drive	Pressure	Capacity	Purification	Power	RPM	Dimensions	Weight

Fast 140 High Pressure Breathing Air Compressors

Description

The Fast 140 is a 4 staged, air cooled, high pressure piston compressor, suitable for breathing air, paintball or industrial applications where large air demand is required. Each unit is equipped with large stainless steel intercoolers/aftercoolers, separators and coalescing filters for absolute moisture removal, easy to use digital control panel, large stainless steel BA filter (with one coalescing pre-filter and two large active carbon / molecular sieve cartridges) producing absolute clean air (CGA Grade E / EN12021 standards), and large openings ensuring easy and rapid maintenance.

The soundproof enclosure in combination with the very low turning speed, reassures smooth, safe, quiet and long life operation. The Fast 140 combines space-saving properties with high-standard permanent performance. The compressor, which is fitted with an extensive array of features, can be further expanded using optional extras to meet your requirements. Be it as an individual compact system or as a part of another system, the Fast 140 series is the right choice if you are seeking durable high output performance.

Fast 180 High Pressure Breathing Air Compressors

Description

The Fast 180 is a 4 stage piston compressor that was designed with large air demand applications such as fire fighting, scuba diving, oil patch breathing air, homeland security teams, haz-mat response teams, industrial breathing air users, laboratory breathing air, commercial diving, and paintball cylinder refilling applications in mind. This continuous duty, 18 CFM (500 L/min) compressor combines a very low operating speed and soundproof insulated enclosure to allow for use in work areas that require low noise levels and reassures smooth, safe, quiet and long life operation.

Some of the standard features include side and rear hinged access panels for ease of maintenance, high temperature alarm and shutdown switch, low oil alarm and shutdown switch and automatic condensate drains. The Fast 180 also includes an advanced electronic control system providing operating, controlling & servicing data showing the filling pressure, operating temperature, running hours and other data such as service remaining hours before filter change. The purification system produces CGA Grade E / EN12021 standard breathing air. This compressor's efficient performance, simple use and reliability, make the Fast 180 the perfect choice for any application.

Fast Series Compressors Consumables and Accessories

Description

To ensure proper operation of your compressor for years to come, there are certain preventative maintenance steps that must be taken. It is better to spend a little bit of time and money to maintain your compressor, than a lot of time and money fixing a compressor that wasn't maintained properly.

American Airworks offers a wide range of consumables for your compressor needs. Our synthetic food grade oil works great with any compressor and is readily available. American Airworks purification filters remove moisture, carbon monoxide, hydrocarbons, oil, taste and odor, and particles. Filtration upgrades utilize additional drying cartridges to extend both filter life and time between filter changes. When used with inlet filters and coalescing pre-filters, this will ensure that your compressor is producing Grade E breathing air.

We offer air sampling test kits and programs to test your air quality from single, annual, semi annual, and quarterly testing, as well as air monitors that not only test for carbon dioxide and moisture levels, but will also shut down your compressor if levels become unsafe.

We also offer accessories such as fill hoses, air storage cylinders, gas boosters, air & oxygen filling stations, and air control panels to complete your air system needs.
