DYNAMIC-DUO

DYNAMIC-DUO-REX

DYNAMIC-DUO-MOD

1. Maxximus-Rex with lock puller and Lock-Slot-8.
2. Maxximus with Lock-Slot-8.
3. Maxximus-Mod with Lock-Slot-8.
4. The three units can be carried in one hand by locking of both without straps.
5. To unlock, tap the handle of the axe on any surface.
6. The Lock-Slot-8 has a new Thermo-Plastic Embossed Rubber Grip and over-strike rubber protection.
7. The embossed grip allows the handle to remain standard without enlarging as many wraps do.
8. The rubber over-strike not only protects damaging the handle but is in a location where your hand is placed to strike an iron of any type during forcible entry op's. All you do is slide your hand to the bottom of the over-strike for a perfect location even in poor light situations.

LIST PRICE:

DYN-DUO	\$350.00
DYN-DUO-MOD	\$350.00
DYN-DUO-REX	\$375.00

LOCK-SLOT-8

1. Perfectly balanced in the hands of the user for striking the Maxximus tools, Pro-Bar, AKA - Halligan.
2. Dropped forged head made of chromed vanadium steel, rockwell heat treated and coated with anti-rust zinc plate.
3. The marrying slot locks the Maxximus to the axe for easy carry with one hand. No straps needed.
4. Quick release by tapping the handle on any surface.
5. Special new Thermo-Plastic Rubber so as to not thicken the grip handle. We have added a rubber overstrike at the axe head. This also measures where your hand should be placed when striking an iron (Maxximus, Pro Bar or any Halligan type bar).
6. A perfect marriage of two great forcible entry tools.

LIST PRICE:

L-S-8

LOCK-SLOT-8

\$135.00

THE BLACK-MAXX

The Black-Maxx is one that cannot be defined as a “sledge” or “maul” that you would carry when needed for the heavy striking tasks that you face everyday in fire fighting.

This is a go to tool for the following:

- 8.5 pound striking force head.
- Pointed blade cutter.
- Nesting slot for the fork of a Halligan Tool to lock and carry both tools in one hand.
- Instant foot hold when pointed end is sunk in a slanted or pitched roof.
- Baseball swing point for easy forcible entry.
- Over strike rubber and measurement guide for hand placement in forcible entry operations.
- A Mini-Battering Ram.
- Handle of embossed thermo rubber grip.

Padlock Breaker
Reinforced-Sheetrock
Hurricane Windows
Auto Windshield Cutter

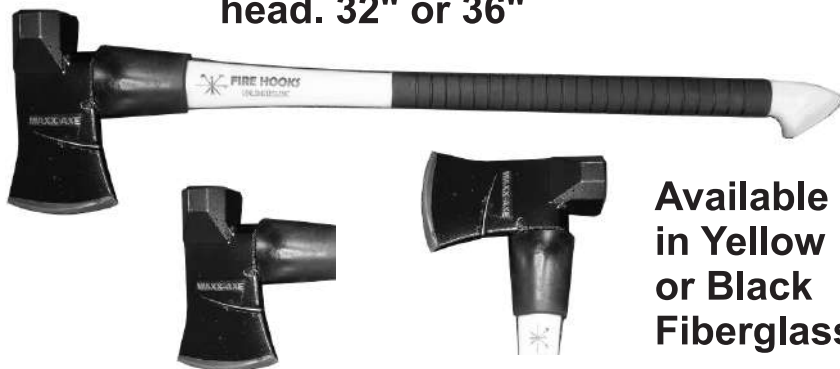

LIST PRICE: **\$185.00**

MAXX-AXE

Dynamic function of a sledge hammer and cutting axe. Overall weight with handle 10 lbs.

Special black handle with thermo-plastic rubber embossed handle that does not thicken handle. Rubber overstrike to measure tool head. 32" or 36"

EXCLUSIVE:
Lock-slot locking feature for your Maximus, Pro-Bar or other Halligan type tools.

Available in Yellow or Black Fiberglass

Excellent tool for either forcible entry or roof op's. Blade stop when penetrating roof.

LIST PRICE: **\$135.00**

The HUSKY-FANG

Diamond Saw Blade

The Husky diamond blade has been specifically designed for Urban Search & Rescue (USAR) teams because it will cut virtually any material. It is specifically crafted to reduce heat during the cutting process.

Some features of this blade are:

- Blade for blade, the ratio is 100:1 of a normal steel (aluminum oxide) or a concrete (silicon oxide) blade.
- Cuts any material found in the fire service. Especially works well in cutting metal - locks, bars, concrete, steel, roll-ups, car posts and any material found in a forcible entry situation.

THE CUTTING SURFACE OF THE HUSKY FANG IS MADE WITH MORE DIAMONDS, CARBIDE AND TUNGSTEN (A HEAT AND CORROSIVE RESISTANT MATERIAL). ALSO ADDED IS A SANDED SURFACE TO ELIMINATE BURRS AND BLADE JAMMING WHEN CUTTING ANY MATERIAL FOUND IN THE FIRE SERVICE. A FORCIBLE ENTRY MUST.

FANG-14

THE LIL REX

Features the same lock-pulling device as the Rex-Tool but without the pry-bar. Carry it in your pocket or wear on your belt with our large 3 inch leather loop. Carry it over the shoulder or wear it around your waist with the belt supplied.

Apply when in operational procedure to pull or pry a lock cylinder with the pick of the pro-bar. Comes with leather sheath, reflective shoulder strap and all operational key.

The LIL-REX
Model # LIL-REX TUBE

LIST PRICE **\$150.00**

J-ROD REX

A modified version of the Rex Tool with "U" shaped sharp tapered blades.

They bite into lock cylinders of all types, shapes and sizes. Extra leverage and original head design provide the mechanical advantage of pulling well secured lock cylinders. The other end is a shaped fork unit that can be slipped between the frame and stiles off the door. It has a gass shut off and ring for additional operations and close quarter striking service.

\$170.00

GAS-WATER KEY

Fits majority of home water and gas-shut offs at street level. The T-style handle makes for easy op's on stiff valves.

\$50.00

MANHOLE HOOK

36 inch "D" handle hook to remove sewer and manhole covers.

\$32.50

DOUBLE-DROP ELEVATOR KEY

\$35.00

THE HYBRID HALLIGAN HYH-30"

The first and only Halligan type non-conductive designed tool for working on hybrid automobiles of all makes. The danger of Lithium Batteries found in this new generation of vehicles, is voltage up to 700v. Using conductive tools can be fatal if grounded or electrified. Fiberglass is known to protect up to 25,000 volts sq per square inch. Our shaft is made of 1 inch diameter of solid fiberglass to a length of 12 inches between the stainless steel wear sleeves. A protective grip in a yellow color to show where protection ends. Remember this is D.C. voltage that grabs and holds.

LIST PRICE **\$190.00**

THE HD BAR HD-30"

Heavy duty Halligan- Pro-Bar type forcible entry tool. Steel Shaft and newly designed Adz-Pick. Fork is gently curved for those tight entry penetration. Our exclusive celtex self extinguishing grip adds to the grip of the tool.

ALL-AXE SET

Includes Leather
Sheath and Shoulder Strap

LIST PRICE:

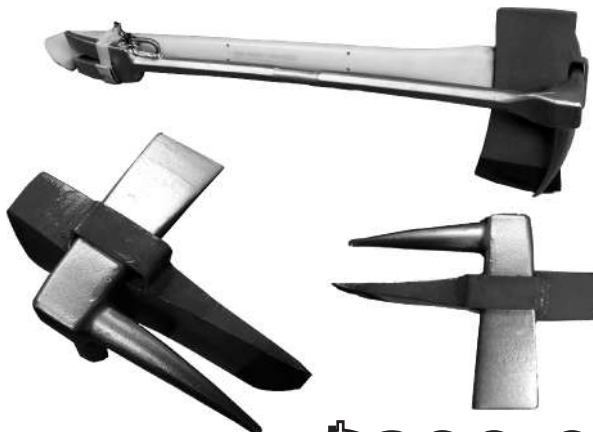

\$215.00

THE FORCE-3

Fire Hooks Unlimited introduces a new Forcible Entry System. It solves an age old problem of carrying an 8 lb. Axe and a Halligan, AKA (Pro-Bar) securely in one hand.

It contains three pieces:

1. Our new 8 lb. 32" ADZ-Axe with super strong handle with deer's hoof. Has three times the strength of normal fiberglass handles. To the top of the axe head, we have welded an ADZ-bracket that is strong enough for sounding lock locations. This method is instructed by Bob Morris of F.D.N.Y. Rescue #1 Unit and well known forcible entry expert.
2. On our 30 inch Pro-Bar (Halligan) we have welded a heavy duty ring that can be struck in tight entry situations. No need to grind the top of your fork for a square hit.
3. We have attached to the ring, a strap for marrying the pair tightly.

Fire Hooks Unlimited Presents: *The WIDE-ADZ* *PRO-BAR*

The Pro-Bar (aka Halligan) is the most popular tool in the fire service today.

The 30-inch Pro-Bar, commonly known as the perfect Forcible Entry tool, is used exclusively by the FDNY, Boston, Chicago and the majority of fire departments throughout the USA.

To make it better we have added more width to the ADZ section of this Pro-Bar from 2 inches to 3 inches.

This 1-inch modification increases the striking surface during forcible entry and adds more serviceable use during overhaul.

CODE: WA-PRO-30"

LIST PRICE

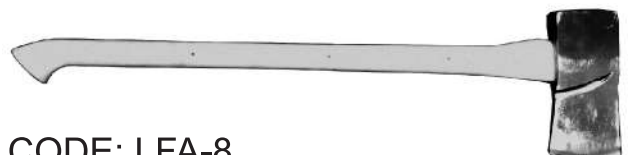

\$250.00

LUMINOUS "8" FORCE AXE

THE 8 LBS. FORCE AXE WE MAKE JUST GOT BETTER. BESIDES OUR TRIPLE STRENGTH FIBERGLASS HANDLE WITH A DEER'S HOOF, WE HAVE ADDED NEW GLOW TECHNOLOGY THAT MAKES THE HANDLE GLOWS IN THE DARK. NOT A PAINT BUT INJECTED INTO THE HANDLE ITSELF.

JUST LIKE A BATTERY,
ANY LIGHT SOURCE WILL CHARGE THE
HANDLE FOR UP TO SIX HOURS USE.
CAN BE CHARGED FOR A LIFETIME.
THE GLOW COLOR IS LIME YELLOW.

ANOTHER FIRST BY FIRE HOOKS UNLIMITED.
WE LEAD WHILE OTHERS FOLLOW.

CODE: LFA-8

LIST PRICE **\$135.00**

THE **PRO BAR**

STATE OF THE ART:

Nowhere else in the United States will you find a forcible entry tool quite like the **PRO-BAR**. Developed by the Forcible Entry Instructor of the N.Y.P.D. this Halligan-type forcible entry tool is the result of years of research and countless interviews with fire chiefs and fire fighters in the N.Y.P.D. and many other large and small departments located in the eastern section of the U.S.

THE PRO-BAR IS: 30" Long

- A Halligan-type forcible entry tool.
- Is drop forged, one piece construction, of alloy steel.
- And most important, the fork, adz and point are designed with the correct lengths, widths and tapers to enable the fire fighter to effect easy penetration and maximum leverage.

Gently curved and tapered for easy penetration.

\$235.00

THE PRO-BAR IS DESIGNED FOR PROFESSIONALS

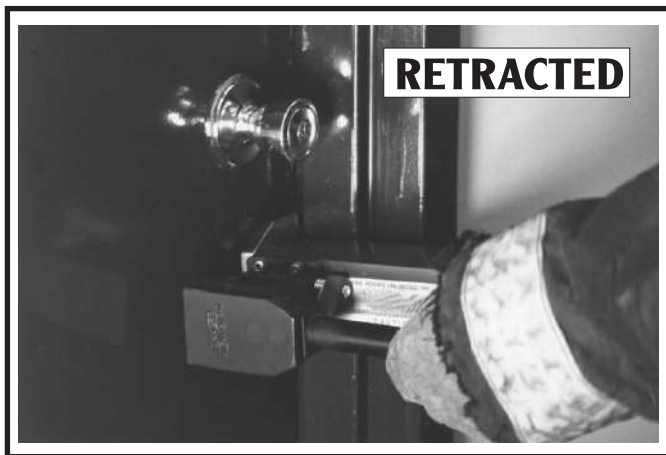

THE OFFICIAL FORCIBLE ENTRY TOOL OF THE NEW YORK FIRE DEPARTMENT
(carried by all 355 fire fighting units in the city)

When the question is forcible entry...

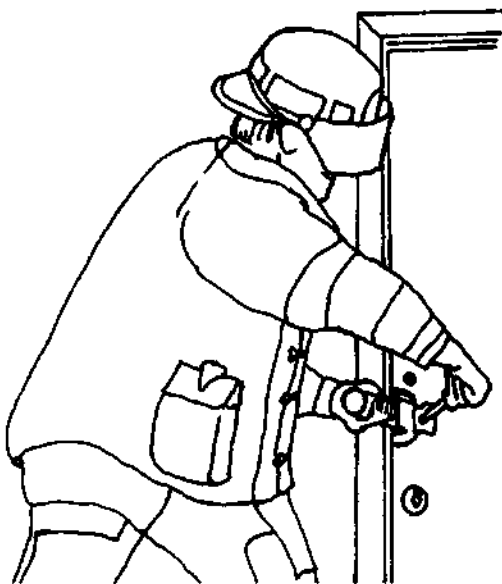

THE ANSWER IS

HYDRA  RAM®

The LIGHTWEIGHT state-of-the-art hydraulic forcible entry tool.

The HYDRA-RAM UNLIMITED®
Patented #5251445

Tested strenuously by the New York City Fire Departments Research and Development Division for 11 months. 3 Hydra-Rams were placed in the busiest Truck and Rescue Companies in the boroughs of Bronx, Manhattan and Brooklyn. Overwhelming approval and recommendation for acceptance by these twelve companies as its hydraulic forcible entry tool.

During the test and evaluation, one fire company, Ladder Co. 4 forced 109 doors during search operations at the World Trade Center after the bombing. IN 1993

Presently In Use By:

- New York City • Boston
- Washington D.C. • Los Angeles Co.

And other major cities in the United States, Europe and the United Kingdom.

HYDRA RAM®

***is truly a
one man operation.***

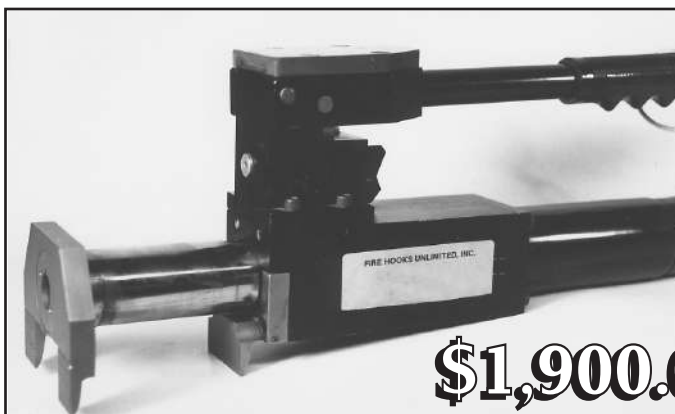

- A. The "Hydra-Ram" is the first and only one piece integrated hydraulic forcible entry tool. No hoses or auxiliary pumps to leak or trip on.
- B. We boast that the "Hydra-Ram" is truly a one man operation since the whole unit is in the hands of the user.
- C. Weighs only 11 lbs. (same as a Pro-Bar) and is 13 inches long.
- D. No worry about maintenance or leaking fluid. We use a patented process incorporating integral aircraft seals of triplex quality.
- E. Our hydraulic fluid is non-flammable, non-toxic and non-freezing.
- F. Special stainless steel of 220,000 tensile strength make up the jaws.
- G. To insure lightness the body is of a special aluminum heat treated and hard anodized to a darkened color of tactical black.
- H. Special finger grips are attached for non-slip holding surface.
- I. 10,000 lbs. of force is presented at 138 lbs. of pumping to acquire 3/4" inch a stroke to a maximum thrust opening of 4 inches.
- J. The "Hydra-Ram" can be placed in any position even upside down without any effect on its operation. A first in hydraulics.
- K. A heavy cordura bag, and mallet compliments the unit.
- L. For the narcotics officer, the unit's unique size (13") and weight (11 lbs.) allows it to be carried under a coat like a hand weapon.
- M. While other take 30- to 40 pumps to gain full extension, ours does it in 8.

JUMBO PRO 54"

A New and Innovative tool for the Millenium. A one piece tool made out of aircraft steel. Designed to replace the tool assignment of the Roof and Outside rear vent man. These Firefighters are assigned Two Tools with variations of a 6ft hook, halligan, (pro-bar) or an axe. The weight factors reaches from 18-21 lbs. While weighing only 1? lbs. with a length of 54" inches, the Jumbo Pro allows a free hadn to assist you while climbing ladders, fire escapes and stairs. It can do the job of Two with the safety feature of One.

Features:

1. Can drop ladders on fire escapes.
2. Can vent the second window off fire escapes.
3. Doesn't hang up on structural supports of fire escapes.
4. Can force window gates with ease.
5. Perfect to pick up roof saw cuts.
6. Can Force open roof doors easily.
7. Using the ring on the fork end and a piece of rope, venting of (EEW) can be accomplished. (Energy Efficient/or Thermal Panes)
8. Drive the fork end into a car hood and pop with ease.
9. Remove window bars on HUD buildings.
10. Adds to the efficiency of normal conventional op's.

CODE: JPB **\$295.00**

24" PRO BAR

One of our best products shortened. This is the same as the 30" Pro-Bar and has the same strength. Ideal for Officers and great for easy storage. Our Pro Bar is used throughout the country due to its reputation and the only difference in this new bar is 6". Rings can be added for an additional charge.

with 2 Rings
Strap - \$230.00**

THE IRON'S NEST

We married the Irons with our Carrying Strap,
Now we will safely nest them down.
The Nest is designed in the correct position for
quick removal whether in the horizontal or
vertical position.
Fabricated out of stainless steel for optimum
strength, durability and rust resistance.
Can be mounted in crew compartment without
fear of tools flying.
One locking pin for quick release.
Drill taps supplied.

MINI-PRO-BAR

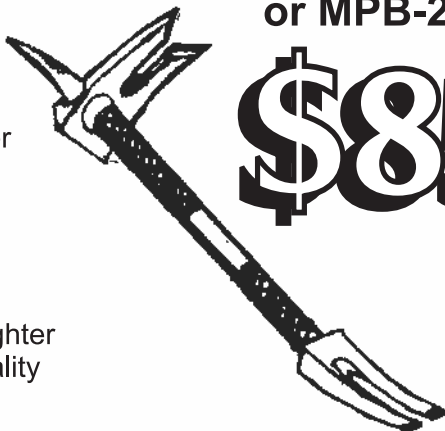

"A" type lock cylinder puller built into the adz end to pull recessed or flushed cylinders.

Handy pike on the adz enables user to pull trim, snap padlocks, make examination holes, pull lath plaster, vent windows and probe during primary search.

Demand a tool designed by a firefighter to meet the highest standard of quality material, design and features.

CODE: MPB-16
or MPB-20

\$85

Knurled shaft enables the firefighter to control the tool in any situation

Nail puller and gas shut-off on both adz & fork end of tool.

**Also Available In
16 Inch Lengths**

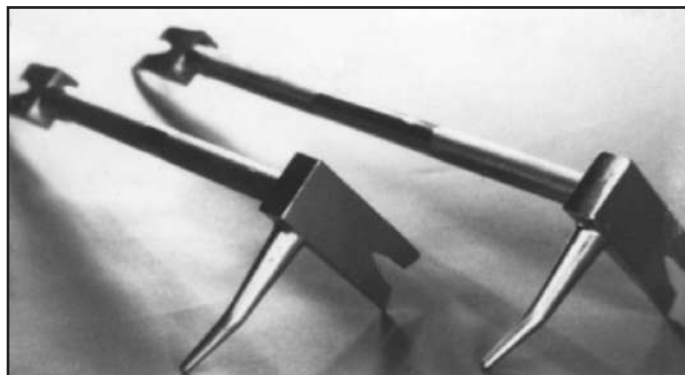

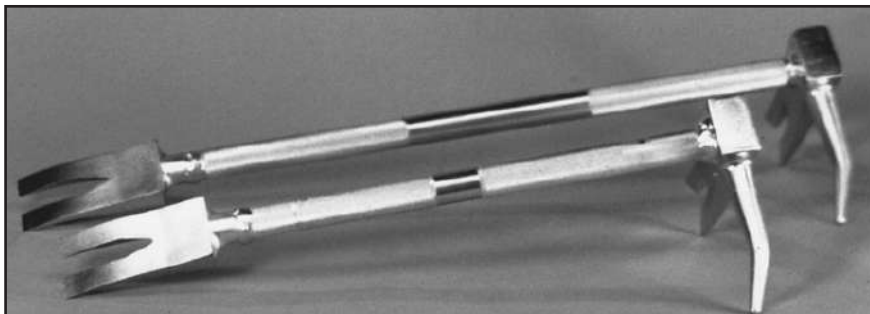

TECHNICAL SPECIFICATIONS

- **Length** - 20-1/2 Inches and 16 Inches
- **Weight** - 3-1/2lbs. and 3-1/4 lbs.
- **Material** - 4130 Aircraft Steel
- **Welds** - Shaft is recessed into fork and adz, heat pressed and welded.

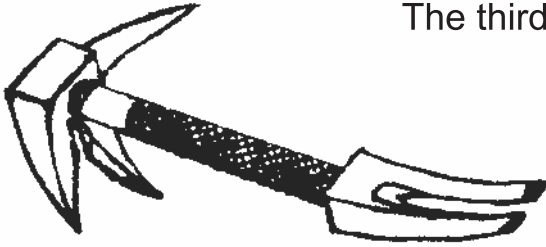

Introducing the new 16 inch Mini-Pro-Bar. It joins our popular and most successful 20 inch size which we have featured since 1980.

Carried by many fire departments as a specified officers tool. A proven quality designed tool used by major fire departments and police units all over the United States.

Li'l-Pro-Bar

This tool is designed for the firefighter, truly the perfect "Truckie" tool.
The third arm of a firefighter.

CODE: LPB

\$70

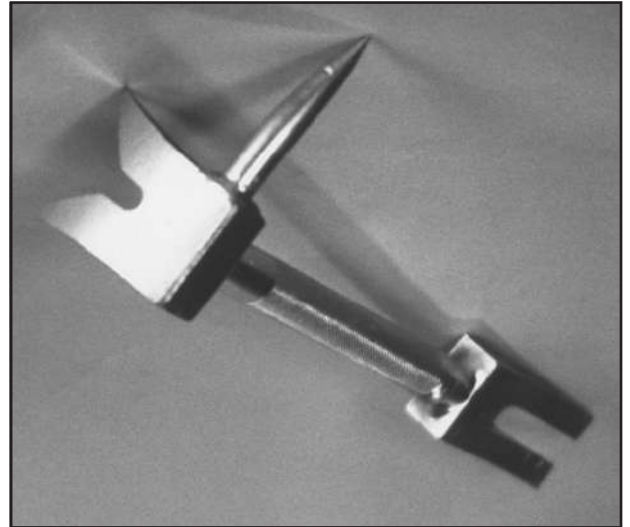

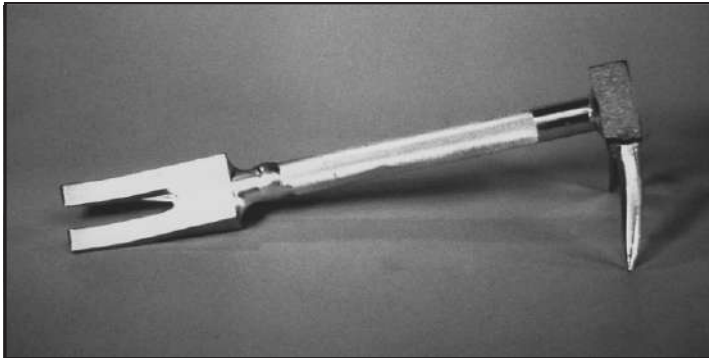

FEATURES:

- Lockpuller
- Gas Shut-Off
- Nail Puller
- Pry Bar

TECHNICAL SPECIFICATIONS

- **Overall Length** - 12 Inches
- **Weight** - 2lbs.
- **Material** - 4130 Aircraft Steel
- **Welds** - Shaft is recessed into fork and adz. Heat treated to 42 Rockwell hardness.

Quote: Captain Bob Farrell, Engine 82, Ladder 31, South Bronx 1965 to 1977 NYFD "No firefighter of any rank should enter a fire building without a tool in his hand."

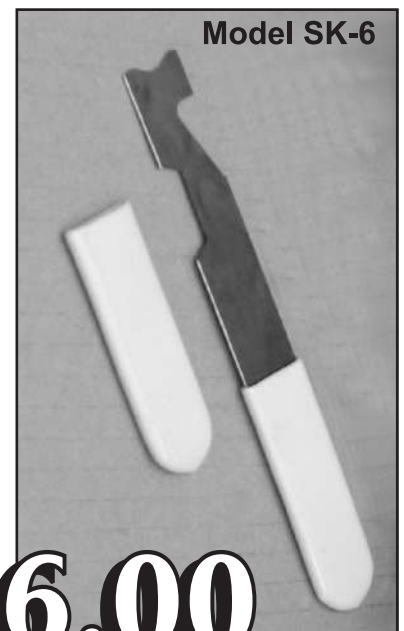

Shove Knife

THE ORIGINAL SHOVE KNIFE

YOU ONLY NEED ONE - DOES THE JOB OF THREE

Our Shove Knife is the fastest, damage free means of opening residential, office interior doors with key in the knob locks. Used extensively in fire towers to slip spring latch locks. The design makes the knife work from either side of the door. If the door opens inward, you shove the knife in back of the molding stop and retract the latch. For doors that open towards you, the knife is slipped in from above or below the latch point and jiggled and pulled to retract the latch. A protective sleeve is added when not in use.

Model SK-6

\$6.00

Truckman's Tool

Carry the Truckman's Tool with the knowledge that it will do it all as a personal tool...

- 1- "A" Type Lockpuller
- 2- Gas Shut-off
- 3- Nail Puller

- 8- Probe During Search
- 9- Thermal Pane Window Breaker
- 10- Chisel and Plate Puller
- 11- Molding and Trim Remover
- 12- Venting Tool

TECHNICAL SPECIFICATIONS

- **Length** - 16 Inches and 12 Inches
- **Weight** - 3lbs. and 2-1/2 lbs.
- **Material** - 4130 Aircraft Steel
- **Welds** - Shaft is recessed into fork and adz, heat pressed and welded.
- **Knurled Grip**

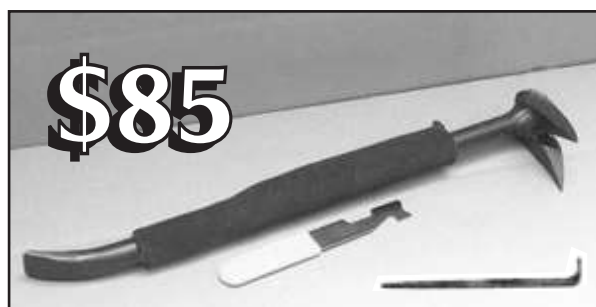

OFFICER'S TOOL "A" Tool Kit

This tool meets the specifications of the FDNY for their standard officer's tool, issued to each firefighting company for use by the officer at his option. It's made of high strength steel with the head welded to the shaft. The shaft is covered with a nonslip gripping surface, the shaft end of the tool is formed into a pry bar capable of slipping into tight spaces.

The head of the tool has a flat driving surface, with an "A" lock puller machined into the adz like blade. For thru the lock forcible entry, the "A" lock puller will remove the lock cylinders from Mortise and Rim locks. The tool will also remove key in the knob locks and tubular locks also. It can be used to remove the steel plates protecting the cylinders on some locks and always found protecting the cylinders on the Fox Police Bar and Brace locks. After the protecting plate is removed, the cylinders can be pulled from the door and the lock opened.

The complete "thru the lock kit" available with the tool contains the officer's tool, a doubled ended "key" tool and shove knife. The "key" tool can be stored inside the nonslip grip on the tool's shaft. After pulling the cylinder, the key tool is slipped into the lock mechanism and the lock can be opened. The straight blade of the key tool is used to open most rim locks. Regardless of the lock cylinder's tail assembly shape, flat, square half moon or cross, the straight blade is inserted into the lock and turned to open the lock. The angled Blade will slide the latch on the mortise locks to open them.

The shove knife is used to slip the spring latch locks found on many key in the knob locks and used in many commercial and office buildings without damage to the doors or lock assemblies.

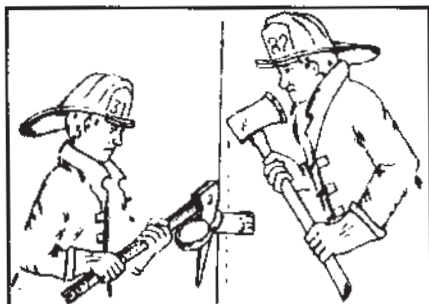

Invented by Bob Farrell, Retired Captain, Ladder Co. #31, South Bronx, NYFD

TECHNICAL SPECIFICATIONS

- **Length** - 17 Inches
- **Weight** - 2-1/2 lbs.
- **Material** - 4130 Aircraft Steel, heat treated to Rockwell #42.
- **Shaft** - Is dropped forged and recessed into head and heat pressed.
- **Celtex** - Covered grip our exclusive item.

UNLIMITED PADLOCK BREAKER

\$115.00

THE DUCKBILL

** We Invented It, We Manufacture It, We Guarantee It **

The Unlimited Lockbreaker Is A Multipurpose Tool.

Breaks the strongest padlock when placed in the shackle and struck with a maul or the back of an axe. Especially useful in roll-up doors on taxpayers and/or commercial buildings found in shopping malls.

SAFETY: Eighteen inch handle keeps hands away from strike zone. Handle is rubberized with celtex for shock absorption.

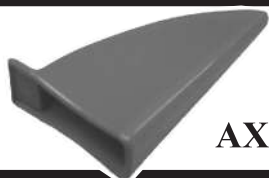

THE FORCE AXE - 8lbs.

The ultimate tool for forcible entry, perfectly balanced to lay correctly in the hands for that short strike stroke on an iron or unlimited padlock breaker. Large, oversized head makes the strike zone more accurate and easy to hit. Cutting edge annealed to keep its edge longer.

New Type Handle: Super strong handle with a rigid fiberglass core surrounded by durable shock absorbing foam. A combination that eliminates the need for hand grips and prevents splintering and breaking on overstrike. Safety color yellow is luminous in smoke and/or poor light situations. A sanded knurl is embossed in the lower part of the handle eliminate slipping.

ALL PURPOSE HOOK

The New York City Fire Department standard hook to exact specifications in every detail. The most versatile hook used in the fire service today. Featuring a multitude of uses, from opening ceilings, walls, floors, moldings and casings to the rapid removal of wood, lath and plaster. Tin and sheet metal, plasterboard, fiberboard and sheetrock.

FEATURES:

A- Specially Tapered Hook-Head Point:

Can be thrust through all materials more easily than conventional hooks.

B- Two Workable Ends:

Allows versatility whether pulling or prying. Reliance in head strength by using meehanite ductliron. The adz on both ends are flared for a larger pulling or prying surface at the contact points.

C- Super Strength Solid Fiberglass Pole:

End bent or broken poles forever. Luminous color is used for safety during smoke or conditions of poor visibility.

D- Stainless Steel Wear Sleeves:

Are drawn over the fiberglass at each end of the hook.

E- Gas Shut-Off, Ram Knob and Directional:

Slot attached to the pole end is a gas shut-off, ram knob and directional slot. You know which direction the head is at all times. High gas meters may be shut from the floor level.

F- *Electrically Non-Conductive*:

G- Celtex Grips:

28 inches of sanded celtex gives the user a positive no-slip shock absorbing grip.

H- We weld all component parts, head and shut-off to stainless steel sleeves.

DRY-WALL HOOK

Super Strong

A hook specifically designed for dry wall removal of all types. Can be used on other materials such as wood, plaster, sheet metal walls and ceilings. An exceptional overhaul hook.

FEATURES:

Larger Contact Point:

A large 4" contact point allows large areas of dry wall or lath and plaster to be pulled with each downward thrust.

Conventional Penetration:

A honed point makes penetration easier even through tough materials.

An Arc Hook:

At the back of the blade is a flexible hook to be used in places of limited space.

Exceptional Pry Action:

The large tooth area and head mass make prying easier.

Combination Rake And Hoe:

The design makes overhauling smoldering rags, rubble and debris of all kinds more efficient.

Handles Made Of Solid Fiberglass:

Super strong solid fiberglass poles end bent or broken poles forever. Luminously colored for safety during conditions of poor visibility. Electrically non-conductive.

Stainless Steel Wear Sleeves:

8" wear sleeves are drawn over the fiberglass at both working ends of the hook.

Celtex Grips:

28" of sanded celtex material give the user a positive no-slip shock absorbing grip.

Available With "D" Handle:
Or Gas Shut-Off and Ram Knob.
The material used is super light manganese alloy.

NEW YORKER

Fiberglass Pike Hook

A strong, conventional hook for quick and effective removal of ceilings, walls, moldings, door and window frames.

This is the standard pike pole of the New York City Fire Department. A redesign of a pike pole used by this department for over 100 years; we lightened, shortened, fluted and streamlined this tool to make it the best of it's type.

The choice of materials makes this hook unique. The New York standard is of malleable iron. We have also developed a material as strong as iron but as light as aluminum. This model "The Lightweight" truly reduces fatigue for the user. Our exclusive sanded celtex grips compliment this unit while enhancing the safety factor for the user. "D" handles available.

D-Handle - \$20.00
extra except where
specified code W/D

NATIONAL HOOK

The Pike Pole Used Nation Wide – The Standard of the Fire Service.

Field Tested To Get The Job Done During Basic Fire Operations.

Features. A- **Pike Head:** Made of tough malleable iron for reliance on head strength.

B- **Choice of Poles:** Fiberglass with ash core (NHFG) or ash (NH). NHF is our model in fiberglass without grips. All these models are made by drawing a 1-1/4" fiberglass tube over rods of ash giving the strongest pole available in the industry.

C- **Luminous Color:** Yellow on fiberglass models.

D- **"D" Handles:** Available on all models except where specified.
(Add \$20.00)

E- **No Slip Grips:** On NHFG models we draw over the fiberglass our exclusive sanded celtex grips. This feature was and is a development of this company to overcome the slippery surface of fiberglass. No other company has yet to develop such a process. A positive safety feature.

F- Assembly of all hooks is completed by using epoxy resins, bonding all parts into one unit.

See Next Page for codes, lengths and prices.

BOSTON RAKE HOOK

Presently in use by The Boston Fire Department. Made of superior craftsmanship using the finest materials. On the head we have forged the Boston design out of carbon steel joining it to a stainless steel wear sleeve. The shaft is solid fiberglass in a bright yellow color. The bottom end is a stainless steel wear sleeve welded to a gas-water directional ram knob. Our exclusive nylon rubber sanded celtex no slip grips are shaped to fit comfortably in the hands of the user.

ARSON-TRASH HOOK

Arson-Trash Hook developed to find hidden fire in deep seated smoldering fires normally found in dumps or dempsey dumpsters. The normal hook just won't pull trash in large quantities. Our trash hook, because of it's two large six inch pointed prongs, will grasp debris in huge chunks.

Manufactured in house incorporating stainless steel wear sleeves welded to steel supported prongs, attached to solid fiberglass with sanded celtex grips and finally an alloy "D" handle.

The normal trash hook is recommended at the six ft. length. For the Arson-Trash Hook to be used in close quarters we suggest our forty inch model. Thinking of transporting the unit, this model is small enough to be placed in the trunk of an automobile. This hook will also aid police narcotic personnel in their search for illegal drugs during raid operations.

List Price Available In Sizes:

TRH - 32" w/D	\$120.00
TRH - 40" w/D	\$120.00
TRH - 4' w/D	\$125.00
TRH - 6' w/D	\$135.00
TRH - 8' w/D	\$145.00

**May Also Be Ordered Without "D" Handle
Substituting Ram Knob.**

X-LOCK 612

Extension Hook Features

Posi-lock extension pole - 1/4 turn clockwise and the extension is locked at any height.

Closed position is 6 ft. and open position is 12 ft. this pike pole will not separate from the body.

Diameter if extension is 1-1/4 inch - body diameter is 1-1/2 inch.

Will fit any tube storage on apparatus of any make.

Lightweight - a workable 5-1/2 lbs. Reduces fatigue drastically.

Can be used as an outside vent hook, high ceiling hook or regular hook and will fit in any elevator.

Cost Effective - any pike pole over 8 ft. must be shipped by truck with minimum charges of 50+ dollars.

This hook can be shipped by UPS saving the buyer 2/3 of truck cost.

Lightweight Freight Saver

ECKERT HOOK

The pride of the mid-town trucks. Used to open up tin ducts, air conditioning systems and complex metal hoods found in restaurants.

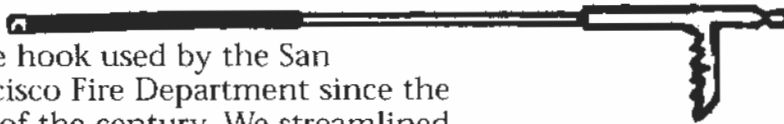

Its sharpened edge serves to penetrate tin on the push stroke while the six sharpened teeth on the under side complete the cut on the pull stroke. Can be used conventionally in the removal of lathe and plaster.

Stainless steel wear sleeves and celtex grips compliment this unit making it the best tin hook on the market barring any in the industry.

SAN FRANCISCO HOOK

The hook used by the San Francisco Fire Department since the turn of the century. We streamlined the design and brought more function to its features. A sharpened edge and penetration point was added to the right angle along with larger gripping teeth on the under side. Celtex grips and fiberglass shaft completes this unit. A gas shut-off and directional slot is built into the ram knob.

(NY) ROOF HOOK

THE FARRELL HOOK

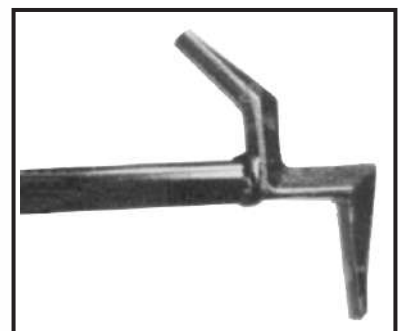

We participated in the development of this tool with the New York City Fire Departments research and development division. Our all-purpose head, aircraft steel shaft, chisel end and celtex grips make up the unit.

The chisel end is used as a prying tool for scuttle hatches and roof doors. The short lengths are for going up fire escapes and scuttles to the roof. Accept only aircraft steel for a light-weight but strong tool. Can also be ordered in fiberglass.

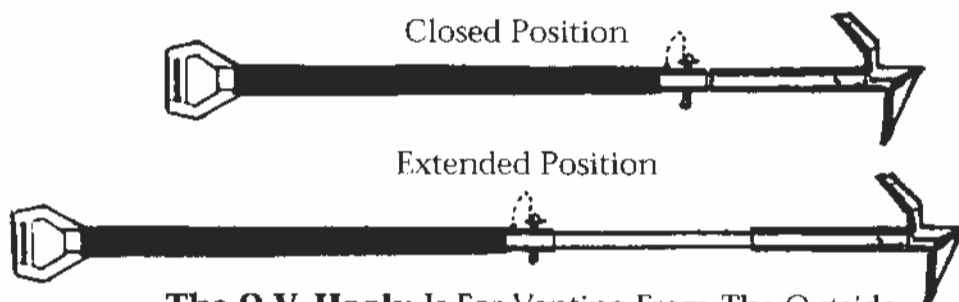

SPECIFY.

Ring added to chisel is \$18.00 Extra

OUTSIDE VENT HOOK

The O.V. Hook: Is For Venting From The Outside.

Roofman: Vents out of reach windows from the roof position, over parapet walls or the roof edge. You can push down ceilings out of reach of the standard 6 ft. hook found in high cocklofts.

Outside Ventman: Vents out of reach windows off fire escapes or ladders. Vents out of reach windows from alleyways or yards from the ground level.

Features: Positive guide sliding channel with lock stop. Sure lock clevis pin with cable attached to the guide nut. Less loss and easy access with this feature. Ball spring release without groping for holes.

All stainless steel surface when in the closed position with the exception of our sanded celtex safety grips.

Fiberglass rod slides in the stainless steel tubing.

UNIVERSAL HOOK

This hook does it all. It can penetrate or pull all types of materials used in the building trades. It features, two sharpened blades. One on top for penetration during thrust. One underneath for slicing on the full stroke. An arc hook on the back of the top blade is used in places of limited space. A chisel tooth of 1-1/2" right angle blade - tooth is sharpened to penetrate loose material on the chop

stroke. Super strength solid fiberglass end bent or broken poles and are electrically non-conductive. Stainless steel wear sleeves are drawn over the pole at both ends. Celtex grips of 28" and sanded, give the user a positive no-slip shock absorbing grip. Available with "D" handles of gas shut-off directional slot and indicator which can drop fire escape ladders.

F.A.T.S.

FLOOR ABOVE THERMAL SET

ROOF VENT

FLOOR ABOVE VENT

Problem:

During the late 60's and early 70's, energy became a prime target for the United States. The oil cartels placed a strangle hold on this country in the form of denying the large usage of oil this country required. The United States implemented many forms of saving oil and energy. One such form was energy efficient windows (E.E.W.'S). In New York City, tax incentives were given to all landlords who replaced single pane windows with this thermal pane type.

This of course saved energy but brought to the fire service the most difficult of fire fighting problems since the multi-story building was invented. Fire operations prior to this change were accomplished by a coordinated ventilation and water application. Ventilation was made by taking out windows from the floor above, from ladders, fire escapes, platforms and roof positions. Most engine attacks from the interior blew windows out with solid stream application on hot windows. Thermal windows do not react like this. Instead of clearing the windows with one swipe of a tool or water application the E.E.W.'S held intact or made only a small hole. This increased heat conditions for back draft by holding in high heat concentration with no air. Extension to upper floors became predominate. Battalion Chiefs had to implement new forms of strategy and operational attack.

Nomenclature:

The structure of these windows were similar to a car windshield except double. Breaking automobile windshields with a tool gets a firefighter a small hole while the window stays intact. The E.E.W.'S are two panes of glass encased in a space filled with argon gas. Some glass is tempered or may have a plastic coating to shield sun rays.

Solution:

Many hook type tools were tried with some success but a change of tool assignment is difficult. Firefighters in the F.D.N.Y. carry a steel 6ft. roof hook and a Halligan tool in the same way a police officer carries a gun. To take away this dynamic-duo would be considered sacrilegious. A new system had to be developed.

History:

The Halligan tool was invented by Deputy Chief Hugh Halligan of the F.D.N.Y. back in 1948. It was introduced to the department in 1950. The Halligan was the most important and versatile tool to enter the fire service and is widely used throughout the world. When Chief Halligan left the job so too went the Halligan tool. Many copies were made but the best of the lot came in the early 60's from a redesign by Bill McLaughlin of the "K" tool fame. I was fortunate to be in the ladder company that tested the tool (PRO-BAR) (Ladder Company 31 in the South Bronx). We overwhelmingly approved of his design. This one piece drop forged tool is still the best made tool on the market today and is specified for use by the F.D.N.Y.

Reinventing the wheel: (F.A.T.S.) Floor Above Thermal Set

Watching a Martial Arts program on the History Channel one night, the Num-chuka weapon was discussed. During this discussion the Num-chuka, which is two sticks and a chain, claimed to add a 100 to 1 ratio on the strike. Light bulbs went on and the F.A.T.S. was born. Adding a ring to the fork end of the Halligan tool and one to the chisel end of the roof hook and joining them together with a chain and two locking hooks the Num-chuka idea was duplicated.

I am sure that Chief Halligan would have been proud that his tool has once again helped to solve the huge problem that the Energy Efficient Windows have placed upon the fire service.

FHG - 28" FLAT - \$55.00**

The Eight Maul

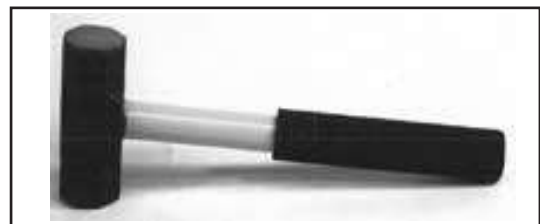

ADZ-BRACKET

Fiberglass 8lb. sledge hammer for forcible entry. Protected handle for overstrike and self extinguishing celtex grips. 28" long to fit any truckmans belt.

MODEL 8-M28-B

\$75.00

The Hammer 3

Solid fiberglass handle with self extinguishing celtex grips weighing 3lbs. Exceptional use as a striking tool for K-Tools, A-Tools and R-Tools. Unit is 12" long.

MODEL HAM-3

\$22.00

Unlimited Folding Spanner

The all new, compact, adjustable universal wrench with finger grips and engraved no slip handle. Will fit pin or rocker lug couplings. No sharp protrusions to cut or tear fireman's pockets. Special alloy for superior strength.

PART: UFS **\$14.00**

Connection Mallet

Unbreakable 2 lb. rubber mallet. Solid fiberglass handle (1" O.D.) sanded celtex no slip grip. Epoxy glued and pinned. Will not break on overstrike. Will give a lifetime of use. Our exclusive tool at an economical price.

CM-2 LB.

\$19.99

Officers Hook

PART: OFH

\$80.00

A personal hook for the officer. All steel construction. Stainless steel handle. No slip celtex grip. For venting, examination holes or for use as a probe during primary search. Will shut off gas with its built in feature. Can be used as a pry -bar, chopping axe or ram. Length 17".

Spring Punch

FOR WINDOW REMOVAL

Simple, Fast and Safe. Press Point in corner of window until spring releases. Point will break glass and you can quickly gain access into the vehicle. Adjustable spring force for light or heavy loading. Double spring loaded barrel harden tip.

Model SP-1

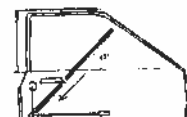

\$9.00

Unlimited Slip Lock

Automobile unlocking tool. For GMX-Body and other GM, Ford, Chrysler and American Motors products. Plastic yellow grip. 30" length for the new cars.

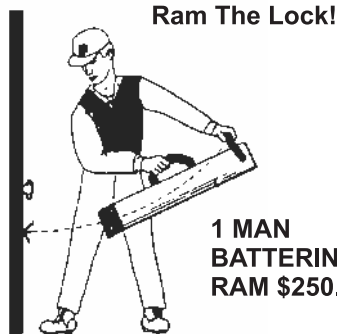

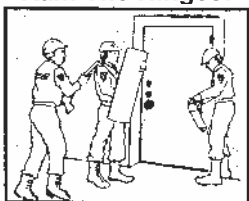

\$10.00

The KAYO

With The
1-2 Punch
One Man
Or Two

Ram The Hinges!

Ram The Lock!

1 MAN
BATTERING
RAM \$250.00

Weight: 40+ lbs. of long lasting epoxy/steel construction. Only 30 inches long with two forward handles and one rear but enough for the second man to hold. Exclusive celtex shock absorbing grips. The highest kinetic impact of any battering Ram on the market with 24,000 lbs. of force. E-Z to Stow and Carry and E-Z to Use.

\$325.00

Bolt Cutters

Model BC-18"
Capacity 5/16"
Length 18 inches
\$60.00

Model BC-24"
Capacity 3/8"
Length 34 inches
\$75.00

Model BC-36"
Capacity 1/2"
Length 36 inches'
\$95.00

Heavy duty contractor quality bolt cutters for concrete reinforcing rods, soft and medium hard bolts, rivets, bar and chain. Rugged extended nose straps support the cutting edge to reduce the possibility of chipping and to prevent cutting above the tool's rated capacity. 14" sanded celtex grips are epoxy glued to each handle eliminating shock after cutting materials. The feel is like no other cutters offered.

Chimney Hook 824

Designed to break creosote buildup after chimney fire is put out. The 824 is a 3 section fiberglass extension pole with a unique ram head. It extends from 8 ft. to 24 ft. and is made to fit any straight chimney.

To Use: Lower top 8ft. section to blockage, turn posi-lock pole 1/4 turn clockwise to lock. If blockage is not felt, lower the second section 8 ft. and repeat first step until blockage is found. The pole does not separate at each section but must be locked in order to push through the blockage.

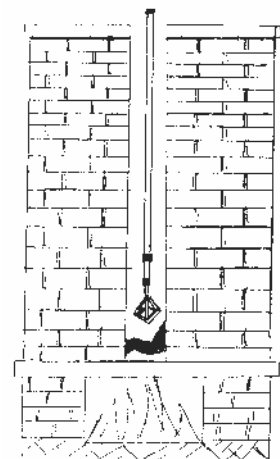

Weight: 8-1/2 lbs.

Length: Closed 106 inches and can be shipped by United Parcel

Length: Open 24 ft. + or - 2 inches.

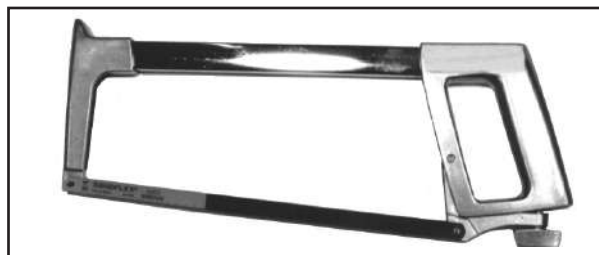

HEAD - 4.5"

CODE: CH-824

\$165.00

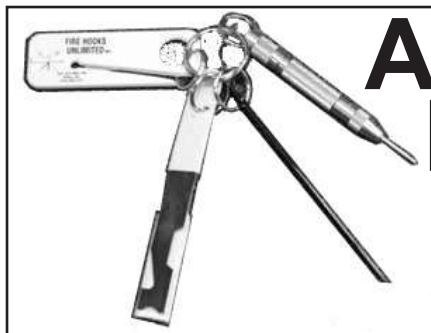

Extrication Hack Saw

Advanced styling, comfort and design, comfortable grip and knuckle guard, oversize handle, chosen to be used with a work glove. Tension device eliminates the "awkward wing nut styles". Frame design permits "flush cutting". No part of the frame extends below the frame of the hacksaw. Two settings of the blade, straight and 55° angle. Storage of blades in the angle of the blade when set in the frame allows the fastest cut possible with a manual hacksaw. Especially quick on automobile frame posts. The best frame deserves the best blade. Top of the line "Sandflex Bi-Metal Blade". Each unit comes with such a blade.

\$45.00

Auto Rescue Kit

**AUTO
RESCUE
KIT**

The Auto Rescue Kit
Contains: Seat Belt Cutter,
Spring Punch, Kerry Key/
Split Ring and Shove Knife

\$22.00

R-Tool Kit

Complete unit includes: R-Tool Bag, Set of
Keys, Shove Knife and Instructions.

A tool designed to pull all types of lock cylinders
too large for the K-Tool unit such as locks that
extend out from the door and 1 inch round are
easily pulled with the R-Tool.

Features: Steel Cutting Blades, Aluminum
Body for Less Wt., Carrying Bag, Loop
Attachment for the Dynamic Foursome.

The K-Tool

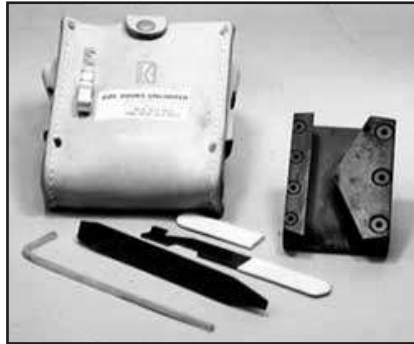

Developed By A Firefighter For Firefighters

Due to the new & stronger doors and locks used in construction of new buildings, forcible entry has become an increasingly longer and harder task to perform. The K-Tool and the "Thru the Lock" method of forcible entry provide a modern approach to this problem.

The complete K-Tool unit includes:

- K-Tool
- Set of Key Tools
- Leather Pouch
- Operation Manual
- Shove Knife

\$155.00

Positioned above lock

Forced on lock

Pulling lock

Key tool tripping lock

K-Tool

A tool designed (by a NYC Fire Lieutenant & licensed locksmith) to pull all types of lock cylinders (rim or mortise) from various glass type or solid doors.

Key Tool

Tool inserted into lock cylinder hole after cylinder is pulled which moves the lock bolt to the open position.

Manual

A manual provided to explain the use of the above tools and the "Thru the Lock" method of forcible entry.

Pouch

A top grain leather pouch designed to carry the K-Tool & set of Key Tools. Prevents loss & keeps the tools together.

Hexagon shaft with goose neck nail puller on one end and chisel blade on the other. Light and slender for those arduous overhauling jobs.

Our exclusive 24 inch sanded celtex grips add to the safety of this bar.

Model GNPB-36"

MADE IN USA

\$35.00

Marrying Strap

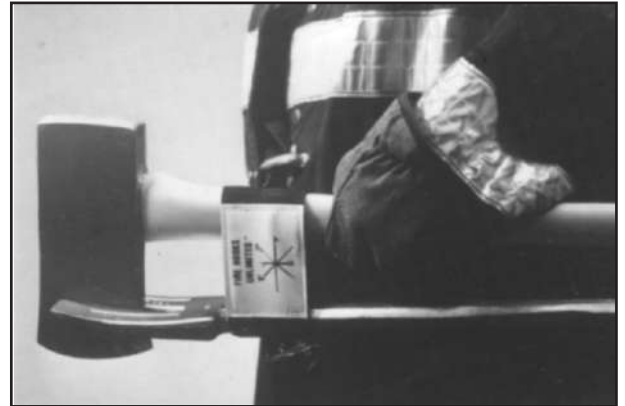

Originated and developed by this company in 1980.

The Marrying Strap was designed to free one hand allowing the other to hold onto a stair railing, ladder rung or hold a flashlight in a dark area.

Its purpose was to marry the irons (Axe and Pro Bar) to each other so the unit could be carried by one hand.

A further development allowed the arrangement to add the "K"-Tool unit making a complete forcible entry unit to be carried in one hand.

See page 18 for more details.

Model MS-1

List Price

\$13.00

The Hydrant Helper Water Plug

This is an original from FIRE HOOKS UNLIMITED, INC. It will seal both 2 1/2" and 4 1/2" Hydrant outlets of a Hydrant with damaged or missing nipples. It can easily be installed by one man, without putting hands in the Hydrant like other Hydrant devices.

\$250.00

TO OPERATE:

Have finger grips in the down position. Place the cross piece stop into the Hydrant. Rotate 180 degrees so Finger grips are on top, this lets cross stop drop vertically in the Hydrant, now turn 90 degrees and turn handles and rubber washer clockwise to seal the outlets of either 2 1/2" or 4 1/2". There are times when these nipples have blown when starting water.

What Makes A Husqvana Even More Active and Versatile?

K-970 AND K-770 WITH CHOPPER BLADES

The Fire Department of New York City, Research and Development Division, has selected these awesome twosomes as their official roof and forcible entry saws.

The FDNY also has chosen the new Chopper Blades with 24 tip and 12 tip carbides which have deep gullets keep RPM's at maximum. The tips are twice the width of the body of the blades to lessen binding and increase the kerf of the cut.

No other saws at 24 and 20 pounds can boast the performance for roof ventilation and forcible entry. Make your saws the active two by selecting the lightweight saws with heavyweight power.

Chopper Blade 12 Tooth 12 inch \$80.00

Chopper Blade 24 Tooth 12 inch \$90.00

Both Chopper blades and saws are available for immediate delivery from the original designer and author of Power Saw Use in the New York City Fire Department.

Keyless Garage Door Entry Tool

This tool enables the user to unlock virtually any overhead garage door that utilizes an electric automatic opener.

It will work on all of the popular brands of doors and openers, which number in the millions nationwide. The time required to open a garage door with this tool varies with the type of door and the skill of the user. The average time range is from ten seconds to one minute.

The object of this tool is to grab and pull the emergency release rope inside the garage on the automatic opener, while standing outside the door, thus unlocking the door. This enables the user to push the door up manually.

T-HOOK

The first hook specifically designed for residential roof work. Two sharp teeth at each end of the T-head make penetration of 90 lbs. to 180 lbs. roof with little effort. A sharpened chisel on the handle end adds to the functional make-up of the tool. Superior prying capabilities when removing roof boards. It can also be used as a rail or foot hold after driving the T through the roof. Pushing down ceilings of cocklofts can also be accomplished by using the T as a ram.

Excellent overhaul tool. Shaft is standard aircraft steel.

Can be substituted with fiberglass. (Please specify)

Exclusive celtex self extinguishing grips.

FIDNEY TOOL BELT

Designed by a Firefighter with the FDNY for Firefighters all over the world. The belt has been tested for over four years and has proven to meet the needs and desires of both Engine and Truck company personnel. The belt is Yellow and Black in color. The belt is made up of Three quick release buckles and HEAVY 2" nylon straps. The belt is designed to be adjusted up to 54" in width. Two of the buckles are on the side and designed to carry a flashlight and a carabiner for holding an assortment of tools. The side drops may be used on either side, right or left it's your preference.

The flashlight selected for this system is the STREAMLIGHT VULCAN which matches the belt's colors. The light is secured on to the belt with a loop system and then reattaching the buckle to the belt. The other drop is designed for a carabiner for holding an assortment of tools such as, (Axe, Pro Bars, personal tools, short hooks, etc.) If for any reason you become tangled up due to the belt, all you have to do is release the main buckle in the front and the belt is off.

CAN HARNESS

NOW WITH REFLECTIVE STRIPES

Model #CH-312

\$47.00

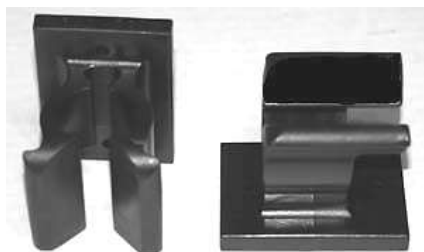

The latest in Extinguisher (can) Harness, held in place by Two 3 inch velcro straps, with a holding power of 2700lbs. A safety strap with a "D" Ring goes through the hanging bracket found in all cans. If for some reason the holding straps are torn the safety straps will hold can from falling out. As seen in pictures the Can Harness has two positions for carrying, 1 - Vertically over the shoulder, or 2 - Horizontally with your hand. This harness was designed to be used in ALL CANS. This new feature is also great for carrying (large) spare S.C.B.A. cylinders when entering High Rises or on your F.A.S.T. team assignment, so you can free up an extra hand.

HYBRID HOOK

Have you thought about the hybrid vehicles?" Some of these cars have electric voltage as high as 600 volts D.C. Direct current as we know draws one in or on after grounding. A.C. current throws one off the ground. If a shortage occurs at an accident which grounds the vehicle, how will we get the victims or our rescuers from an electrical grounding. Hence the Hybrid Hook, 6 ft. of fiberglass protection that will withstand 2500 volts per square inch to protect our rescuers and victims. Similar to a pool hook but designed for control by its unique handle.

THE HUSKY

**INTRODUCING THE MOST VERSATILE
BLADE THAT CAN BE USED ON ANY
POWER SAW WHETHER GAS, ELECTRIC
OR BATTERY OPERATED. WILL CUT
VIRTUALLY ANYTHING ON SITE.**

14" BLADE \$185.00 12" BLADE \$165.00

This exceptional diamond blade has been specifically designed for Urban Search & Rescue teams because it will cut any material. It is specifically crafted to reduce heat during the cutting process.

Some features of this blade are: Blade for blade, the ratio is 100:1 of a normal steel (aluminum oxide) or a concrete (silicon oxide) blade; cuts any material found in the fire service. Especially works well in cutting metal - locks, bars, concrete, steel, roll-ups, car posts and any material found in a forcible entry situation; the 4.5" blade can be used with a battery operated grinder to cut hurricane glass found in coastal buildings or just locks, bars or anything in limited spaces; the cutting surface of this blade is made with diamonds, carbide and tungsten (a heat and corrosive resistant material). It makes the blade almost indestructible when cutting any material.

This blade is a forcible entry MUST, along with a light weight saw such as the Husqvana K-770, 14-inch model. Can be used on any power saw and has a double arbor size 20mm with a knockout to 1 inch.

Available in 12" and 14".

INTRODUCING THE FLOODFIGHTER 150

FIRE HOOKS UNLIMITED

Presents

THE

FIRE TUFF SAW

- New X-TORQ engine provides high torque over a very wide RPM range.
- Low exhaust emission levels in accordance with EPA #.
- Durable and robust saw body, cast three pieces crank shaft and reinforced crankcase.
- Ergonomically improved handles reduce fatigue.
- Air injection makes the saw run stronger and longer.
- Smart-Start and purge pump provides easier starting.
- This saw is made for multiple rough ON and OFF operations.
- Weighs a perfect 12 lbs. of weight distribution.

The FIRE TUFF comes with these additions:

- A powerful 3.5 horsepower engine.
- Bar and Chain included - 18 inch bar with chain to handle any operations.
- Reflective saw shoulder carrying sling.
